The WorldTradePort, Connecting Windows of Opportunity

Fast Trading anyplace anywhere anytime

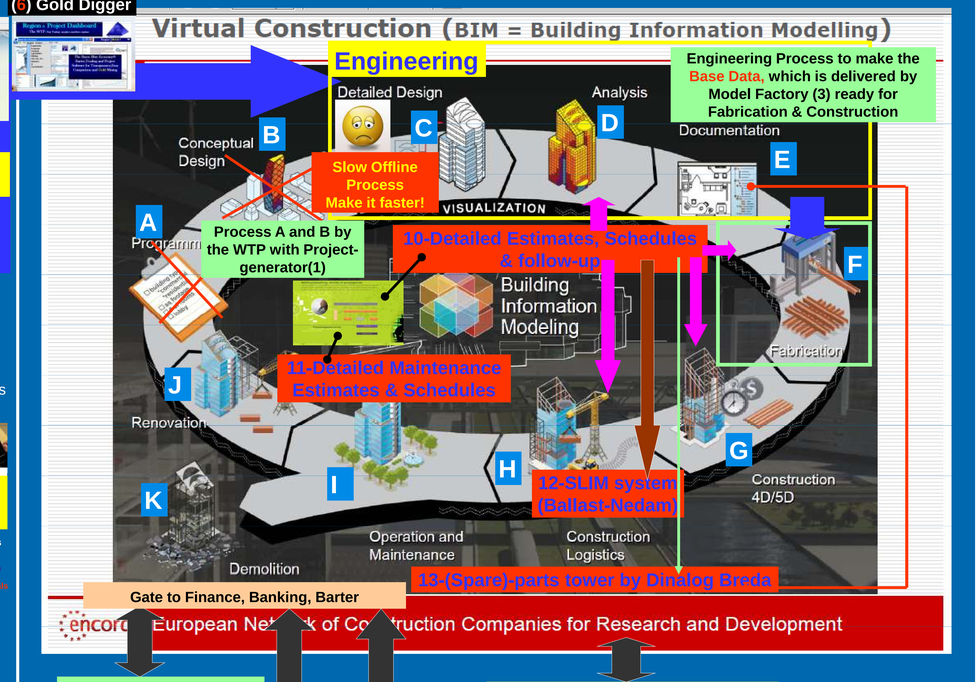
Think Global, Act Global, Start Global

The WTP for ease, co-operation, financing, dealing, transparency and to create employment everywhere

BAYZE
Caring Solution©
The Worldtradeport is a Bayze International Initiative 2010-2018

Overview of the WorldTradePort System (components, connections, add-ons, workplace extension, temporary project organisations, new project philosophy)
Combined with BIM incl. SLIM, the (Spare)-parts Tower, Finance-, Banking and Barter Bank-system

(1) Project-Generator (2) The Project Community (3) Model Factory (4) Trade Ports (2/3000 x) **(5) Trade News** **(6) Gold Digger**



(5) Add-Ons from other developers

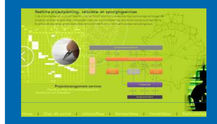
A-Jobplaza, matching resources

B-Chart layers (minerals, energy, crops, etc)

C-Building Information Systems

D-Digital Business Centre.... Etc.
For making temporary sub-organisations in an easy way

E-Calculation, Scheduling / follow-up system

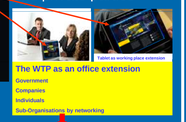


(6) Communities

Engineers, Architects, City Planners, Similar companies, ... etc. and New jobs (to be identified)

(7) Connect with Linkedin, Facebook, Twitter, Efactor, Banks, investors

(8) The WTP as an extension of a working place for employers of government, companies and private parties



Temporary Project Organisations

Existing Organisations or free lancers

= Available time of expert in an organisation or as a free lancer
= Partly detaching
= 100% detaching

(9) All WTP-Projects use the philosophy of "Projects Like the Olympics©" derived from the ESP-Triangle® (Efficiency-Serendipity-Project)

Input

Thousands of people making thousands of models and projects

Benchmarking Fair Trade

Gold digging

Higher Deal Accu-racy

(4) The Trade Port's (Digital Hanseatic Cities / Satellites)

http://www.wtp.center/

Etc.
In 2013
2000-3000
Trade Ports

- **Pay Down on the Nail**
- **Don't be pennywise pound foolish**
- **Stop competing, start co-operating**

Remarks:
The models are including engineering data for faster engineering (little modification in the BIM). What GATE-data does the BIM-Engineering need?

Systems 14,15 and 16 tot be determined and communicated with the Financial World (Action Alfred –September 2012)

Rev.0, date 3-aug-12, Rev.1,date 11-nov-12, Rev.2,date15-jan-15

Typical Build-up of a WTP & Region

Chart Legend: all
- Development per sector
- Polygons
- Transport
- Any combined activities the ground
- Supply and demand
- Networking
- Inter-company project organizations
- Etc.

(A) Business Model Development of total WorldTradePort system

Phase 1: (2011 until Q3-2012)
- Initial investment made by Tecson Engineers Rotterdam for the Infra-Generator© (1)
- Initial investment made by Bayze for online Project Community/ working Place (2)
- Partner for the development of the Infra-Generator© (1) – Vibes Consultancy

Phase 2: (Q3/Q4-2012 ...2015)
- Talk about deal made in 2011 with Rijkswaterstaat DON (10% of maintenance future savings is for WTP-development !). There's now a chance for saving a lot of money at the Nijverdal Tunnel. It needs good communication. Bayze's share is about 1 million euro's for the WTP-development (1 to 8)
- Talk about statement made by Rijkswaterstaat in 2009 "if anyone can save money in the future we will make the necessary investment now!". With the WTP we will be able to save a lot of money in the near future (1-10 years) in projects and maintenance.

- Make deals with bigger companies

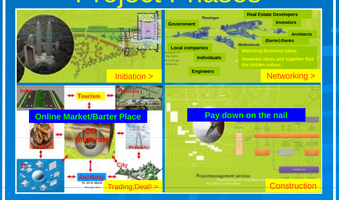
Phase 3: (2013...2015)
- Help government/companies to earn money with projects (in other countries). A % is for the WTP.
- etc. in due time people will find other usage for the WTP with new business models.

(B) Business Model Development of a Trade Port

Phase 1: Q3/4-2012..2015
- Make deals with municipal for savings in Projects and Maintenance for employment in return

Phase 2: (2013...2015)
- Help government / companies / individuals to earn money with projects (in other countries). A % is for the WTP.
- Reorganize websites of smaller companies-> Co-operational websites!
- etc. in due time people will find other usage for the WTP with new business models.

Project Phases



Barter Bank

New School, 2012 and beyond
1. ESP-relation
2. Opportunity Management
3. Trust
4. Co-operation
5. Compliance

Developing your talent (s) is a responsibility to yourself and the world society, it's NOT free (without obligation). It needs self-discipline, co-operation, patience, endurance.

Old School before 2012
1. Good/Bad, Right/Wrong
2. Risk Management
3. Conditional "Trust"
4. Competition
5. Secrets for own profit

Path of total shutdown of world society, crisis after crisis, uncertain future.
